

FCC members:

I am writing this to urge you to reject the NAB's petition 04-160. I have had XM radio for about 6 months now and I do not ever wish to listen to broadcast radio again. Broadcast radio may have been a great idea when it was introduced, but it should not be the sole choice for local information, that seems to contradict the first amendment of the constitution. I find that broadcast radio is littered with too many commercials, idiotic DJs, and in general a lot of bad content. This is only my opinion, though, and others will certainly have different ones. But that is, to me, the underlying point of this country. If you wish to support this legislation and limit people's choices, be full aware that we are approaching a communistic state. I hope that never happens, but limiting freedom of speech is exactly how that process always begins.

Thank you for reading,  
Kenneth Hedderman
